Trần Khương Trung Nhật Quang

Full-stack Developer

tktnq2004@gmail.com | 0947535906 | Long Bình, 9 District, Ho Chi Minh city | Github

Information Technology graduate pursuing a career in full-stack web development. Seeking an opportunity to apply my technical skills, gain real-world experience, contribute to the company, and grow as a professional Full-stack Developer

EDUCATION

Ho Chi Minh University of Technology (Hutech) 2022 – 2026

Bachelor of Software Engineering GPA: 3.6 / 4

SKILLS

Languages: JavaScript, C#, Java, SQL
Frontend: React, Razor Page, Thymeleaf, Next.js
Backend: Node.js, Express, ASP.NET Core, Spring boot
Database: SQL Server, MongoDB, MySQL
Tools: Git, GitHub, Postman

EXPERIENCE

Intern - Web Full-stack Developer April 2026 – June 2026

Bong Mai Information Technology Co., Ltd. (TIHA)

A management system for a lottery agency to digitize ticket sales, agent debt tracking, and revenue reporting.

- Developed a Lottery Ticket Management System with **8 management modules**, **6 core business workflows, and 7 reporting modules** for revenue, expenses, ticket operations, and debt management.
- Built the frontend with React and developed RESTful APIs with Express.js to handle business logic and data processing.
- Designed and integrated a **SQL Server** database with **8 relational tables.** Deployed the frontend on Vercel and backend on Render.

PROJECTS

Mini Online Travel Agency | Github April 2025 - June 2025

Full-stack Developer | ASP.NET MVC, Entity Framework, SQL Server, MapLibre, Pannellum, VNPay API

A hotel booking website that lets users search 100+ hotels across Vietnam, view 360° panorama room photos, book as a guest without creating an account first, and pay online.

- Designed a **16-table relational database** in **SQL Server**, using **LINQ to SQL** as the data access layer for hotels, rooms, bookings, and discounts.
- Built hotel search and an interactive map (**MapLibre GL JS** + **MapTiler**) showing **100+ hotel** locations, with room filters by type, price, and check-in/check-out availability.
- Integrated **Pannellum** for **360° panorama room viewing**, and let guests complete a booking without logging in.
- Implemented **VNPay online payment**, **automatic cancellation of unpaid bookings** after 20 minutes, and **automatic email confirmation**.

Hotel Booking Management | Github Mar 2025 - April 2026

Full-stack Developer | React, Axios, Express, Node.js, JWT, Joi, MongoDB, Tailwind CSS

A web app for hotel room booking, with two roles: customer (search and book rooms) and admin (manage rooms, pricing, and view a dashboard).

- Built a **REST API (27 endpoints, 5 MongoDB models)** with **Express**, including a secure auth flow: **JWT access/refresh tokens (15 min / 7 days, HttpOnly cookies, server-side revocation)**, **bcrypt hashing**, and **Joi** schema validation on register/login input.
- Used an **Axios** interceptor on the frontend to attach JWT tokens, **auto-refresh** expired tokens, and **queue concurrent failed requests so users stay logged in**.
- Built the core booking logic: prevented double bookings with date-overlap checks, and calculated nightly prices from admin-defined pricing rules.
- Built **11 React pages** for room search, booking, and booking history, plus an admin dashboard using MongoDB aggregation pipelines for revenue stats.
- Wrote 6 Jest/Supertest integration tests with an in-memory MongoDB.
